INQUIRIES

for information about other ABS statistics and services please refer to the back cover of this
publication.

#### SYMBOLS AND OTHER USAGES

NOTE: Monthly Summary of Statistics preliminary figures are not indicated by the symbol 'p'. All revisions, however, will be indicated by the symbol 'r'.

Standard notations are used throughout this publication, with meanings as follows:

- kWh kilowatt hour
  - L litre
  - MJ megajoule
- n.a. not available
- n.e.c. not elsewhere classified
- n.e.s. not elsewhere specified
- n.p. not available for publication but included in totals where applicable
- n.y.a. not yet available
  - r figure or series revised since previous issue
  - \* subject to sampling variability too high for most practical purposes.
  - .. not applicable
  - nil or rounded to zero
- —— break in continuity of series (where a line is drawn across a column between two consecutive figures)

Where figures have been rounded, discrepancies may occur between sums of the component items and the totals shown,

#### SEASONALLY ADJUSTED INDICATORS

In most instances, the aim in compiling monthly or quarterly economic time series is to provide evidence of movement, in order to indicate the effects changing conditions are having on the activities being measured—and, in so doing, to signal what might be likely to occur in the near future. Seasonal adjustment is a technique designed to assist in these processes of analysis and interpretation by removing the estimated effects of normal seasonal variation from statistical series, so that the effects of other influences on the series may be more clearly recognised.

Details of the methods used in deriving the seasonally adjusted figures shown in this publication are given in the publication Seasonally Adjusted Indicators (1308.0), last issued in 1983 by the Central Office of the ABS.

Seasonally adjusted statistics are revised following revision to the original data and as additional data are brought into the analysis each year.

For series where one of the components and the total of the components have been seasonally adjusted (e.g. private dwellings and total dwellings), any figures derived by deduction (in the example quoted—government dwellings) do not amount to a formally seasonally adjusted series for the balance of the components.

1993	14.4	7.1	6.2	6.4	2.5

<sup>(</sup>a) Statistics in this table relate to vital events which occurred in each quarter and year shown, and are registered up to the release of this publication. Because of late registrations, they are likely to be revised, particularly the most recent periods. (b) Births and deaths statistics relate to events which occurred in Australia where the usual residence was within NSW. (c) Deaths under one year of age. (d) Number per 1,000 of estimated resident population at 30 June, or number of infant deaths per 1,000 live births.

NOTE: The tables on pages 2 to 5 contain estimates derived from the Monthly Population Survey which is conducted on a sample basis throughout Australia. Explanatory notes and a technical note about the estimates and further detailed estimates (including industry and occupation details) are contained in *The Labour Force*, *New South Wales* (6201.1) which is issued quarterly and is available from the Sydney Office of the ABS.

<sup>(</sup>a) Sydney Major Statistical Region is equivalent to Sydney Statistical Division. (b) The number of unemployed in each group expressed as a percentage of the labour force in the same group. (c) The labour force in each group expressed as a percentage of the civilian population aged 15 and over in the same group.

June	77.4	51.2	32.1	12.4	22.3	25.6	60.0	281.1	65.0

<sup>(</sup>a) Period from the time the person began looking for work or was stood down to the end of the reference week. Periods of incomployment are recorded in complete weeks and this results in a slight understatement of duration. (b) Average duration is obtained by dividing the aggregate number of weeks a group has been unemployed by the number of persons in that group.

<sup>(</sup>a) Full-time employees are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week. (b) Part-time employees are permanent, temporary and casual employees who are not full-time employees as previously defined.

NOTE: The tables on pages 6 and 7 contain estimates derived from the Survey of Employment and Earnings, an Australia-wide employer-based survey. Explanatory notes are contained in *Employed Wage and Salary Earners*. Australia (6248.0), which is issued quarterly and is available from the Sydney Office of the ABS. Estimates derived from the Survey of Employment and Earnings will differ from labour force estimates derived from the Monthly Population Survey for the reasons set out in the Information Paper Comparison of Employment Estimates from the Labour Force Survey and the Survey of Employment and Earnings (6263.0).

1994					
February	3.41	1.33	7.77	17.12	
May	3.61	1.42	7.54	18.85	

<sup>(</sup>a) Overtime is time worked in excess of award, standard or agreed hours of work for which payment is received. Overtime hours represent the number of hours of evertime paid for. (b) The figures shown are based on the last pay period ending on or before the third Friday of the month shown. (c) Calculated by dividing total overtime hours paid for in each group by the total number of employees in the same group. (d) Calculated by dividing total overtime hours paid for overtime. (e) The number of employees who were paid for overtime as a percentage of the total number of employees.

<sup>(</sup>a) Working days lost refer to days lost by: (i) employees who were directly involved in the dispute, and (ii) employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; excluded is the time lost, as a result of the disputes, by employees in other establishments. (b) Relates to industrial disputes involving a stoppage of work for a minimum of 10 working days, regardless of the length of the stoppage, for example, 80 employees on strike for one hour. Disputes are classified by industry according to the Australian Standard Industrial Classification (ASIC).

Eight capitals (a), All groups	95.2	102.5	106.0	107.3	108.9	109.3	109.8	110.0	110.4

<sup>(</sup>a) Weighted average of eight capital cities.

NOTE: The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage and salary earner households. The index covers a large and representative selection of commodities and services arranged in eight major groups.

TABLE 15. PRICE INDEXES OF MATERIALS USED IN HOUSE BUILDING (Base of each group index: 1985–86 = 100.0)

Item	June 1991	June 1992	June 1993	May 1993	March 1994	April 1994	May 1994
Sydney, selected items—

<sup>(</sup>a) These are gross contents of metallic minerals produced, as determined by assay, and make no allowance for losses in smelting and refining. The quantities shown are therefore, in general, greater than those actually recoverable. (b) Includes the metallic contents (when finally separated) of zircon-rutile concentrates recovered in NSW and finally separated in Queensland. Excludes the metallic contents of zircon-rutile concentrates recovered in Queensland or imported into Australia and finally separated in NSW. (c) Content of fine metal.

TABLE 18. COAL PRODUCTION IN NSW (Source: Joint Coal Board) ('000 tonnes)

<sup>(</sup>a) Prior to July 1991, refinancing was included in Purchase of established dwellings. The value of refinancing in March was \$159.2m and is included in Total lending commitments. (b) From October 1989 the savings and trading bank series are combined. This is in line with changes to the Banking Act 1959 which effectively removes the distinction between savings and trading banks. (c) The type of lender statistics reflect the change of the St George Building Society, in New South Wales and the Australian Capital Territory, and the Victorian Savings and Loans Society, in Victoria, to the St George Bank. Lending activity data reported by St George Bank are included from July 1992 onwards under the Banks' classification.

<sup>(</sup>a) The figures shown are estimates derived from a monthly survey of retail establishments. Excludes motor vehicle, boat and caravan dealers, service stations, smash repairers, tyre and battery retailers, bread and milk vendors, footwear repairers and electrical appliance repairers n.e.c. Retail establishments which do not have employees are excluded from the survey. Turnover includes retail sales, wholesale sales, takings from repairs, meals and hiring of goods; and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets etc.). (b) Includes photographic equipment stores, sports and toy stores, stationers and book stores, second hand goods dealers, nurseries and florists, hairdressers and beauty salons and retailers n.e.c.

NOTE: For a detailed explanation of the improved framework updating procedures see the publication Retail Trade. Australia, March 1991 (8501.0).

# For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available at all ABS Offices (see below for contact details).

# Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

## National Dial-a-Statistic Line

0055 86 400

This number gives you 24 hour access, 365 days a year for a range of statistics.

#### **Electronic Data Services**

A wide range of ABS data are available on electronic media. The ABS PC TELESTATS service delivers major economic indicator main features ready to download into personal computers on the day of release. The PC Ausstats service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

## **Bookshops and Subscriptions**

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
